# Kid's CREATE A CARD

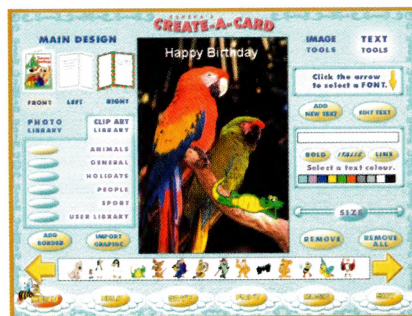

WINDOWS® & MACINTOSH®

**Kid's Create A Card** is an interactive CD ROM package that provides hours of entertainment in making your very own cards for all occasions. The program enhances creativity, thinking skills, computer literacy skills and is fun and easy to use. The interactive help and voice prompts will guide you throughout the program.

Use the **Create A Card Wizard** and follow six simple steps to card making or design and create your own pictures for your card.

Design the front, insides and back of the card by choosing images from a huge variety of clip art and photos located in different libraries included within the program. You can select from many different images such as animals, people, space, underwater, sports, holidays and many more. Select and add one of the many pre-designed borders. You can also import images onto your card.

Add up to ten lines of text for your own special greetings and messages. You can choose the font, colour and size of your text. You can also print your cards on either A4 or A5 paper.

Enter your name when you begin and you can save your favourite cards to show friends and family and for later use. Your name will also appear on the back of each card that you print. Enter a name for each new user so that friends and family can save their cards too!

### MINIMUM SYSTEM REQUIREMENTS
